

# CASE STUDY:

## *ER Overflow Portable Units*

**PROJECT PARTNERS:** Mountains Community Hospital

**BUILDING USE:** Service ER department overflow due to COVID-19 plus office and storage space during remodeling

### The Challenge

Nestled in the San Bernardino Mountains, Mountains Community Hospital has served its community since 1951. Typically accommodating around 26,000 patients per year, the small, 37-bed hospital, was not left untouched when the COVID-19 outbreak took off. Suddenly dealing with an influx of patients to its Emergency Room, the hospital turned to Mobile Modular Portable Storage for immediate solutions. Emergency Department Manager, Steve Early, contacted our experts in search of solutions that could address several needs for the hospital, including appropriate auxiliary space to care for COVID-19 patients and additional office and storage space during remodeling work.

### The Solution

After determining the best storage container solutions for the hospital, we delivered:

- Four 40-foot office units
- One 20-foot office/storage combo unit

While delivery was successful, the units were transported from our Mira Loma yard, up the somewhat treacherous Highway 18 to the hospital. Our expert team of skilled drivers navigated the switchback-filled highway with ease in the 18-wheelers needed for transport, across a route that's difficult even for a passenger car.

### RENT, LEASE, OR PURCHASE NOW
