

CASE STUDY:

Portable Storage on the Frontlines of COVID-19

PROJECT PARTNERS: Mt. Sinai Chicago, IL

BUILDING USE: COVID-19 patient assessment units and space to separate those exhibiting symptoms of the virus from the ER

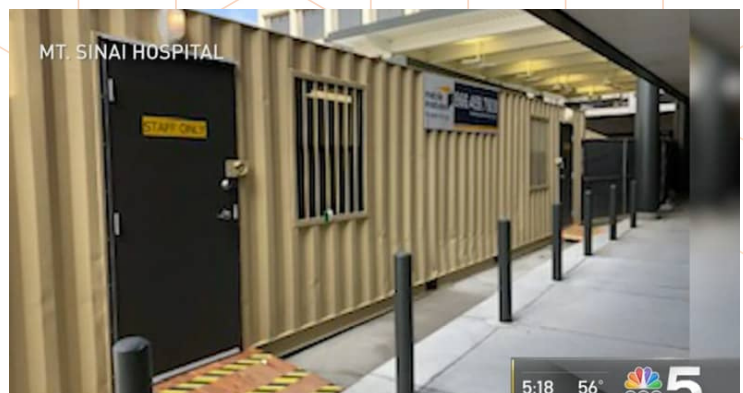

At the corner of 15th and California streets on Chicago's west side sits Mt. Sinai Hospital, which serves as the largest safety-net hospital in the state of Illinois, treating patients that are frequently without health insurance, poor, and often victims of violence.

Now at the frontlines of a new medical emergency, Mt. Sinai turned to Mobile Modular Portable Storage solutions to help address the urgent need for extra space to funnel those patients exhibiting symptoms of the COVID-19 virus.

We delivered two high-security 40-foot ground-level office units to give medical staff a space to receive and assess patients. The units featured lockable doors, panel flooring, A/C units, two high-security windows, and end tables.

UNIT FEATURES

- Fire, wind, and water-resistant
- Lockable main doors
- High-security windows
- HVAC systems
- Lights
- Electric outlets
- Insulation and security features
