

# PREPARING YOUR SITE FOR DELIVERY

Here are four tips to ensure you have adequate space and that the unit is pre-loaded correctly for your portable storage container delivery.

*\*Site must be level, accessible, and free of obstruction prior to delivery.*

**1** Depending on your storage container size rental, our delivery trucks will need the following clearance below plus an additional 15' in width and 15' in height.

## 10 FOOTER

## 20-24 FOOTER

## 40 FOOTER

**2** Next, for storage containers, tell us if you would like the container doors loaded near or away from the cab of the delivery truck.

**3** For an office/storage combo container delivery, follow these guides for your entry doors best location. Always take into consideration available clearance space when opening the entry door.

**4** For an all office container delivery, follow these guides for your entry doors best location. Always take into consideration available clearance space when opening the entry door.

Getting your storage container on your site is simple with us. We can help you in applying these guides for a smooth delivery process.
